

RayCryl® 1244

All-Acrylic Emulsion

MARKET SEGMENT: CONSTRUCTION

COMMON APPLICATIONS: PRIMER, TOPCOAT

RayCryl® 1244 is a self-crosslinking all-acrylic polymer developed to address performance failures that commonly occur with conventional acrylics. It provides excellent early blister resistance and abrasive scrub resistance, as well as a good balance of tensile and elongation. Ambient temperature crosslinking significantly strengthens the abrasion resistance and hardness, improving performance over other tennis court paints.

PERFORMANCE BENEFITS

- UV resistance
- Exterior durability
- Wet adhesion

TYPICAL PROPERTIES

Weight Solids	50%
Weight/Gallon	8.79
pH	8.0 – 9.0
Volume Solids	47.2%
MFFT	0° C
Volatile(s)	Water

These typical properties do not represent specifications.
